Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Prosecution Application

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/13/2004 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 6, 21-22 and 28-29 are rejected under 35 U.S.C. 102 (e) as being anticipated by McKenzie et al (6,499,487)

Regarding claims 1, 21-22 and 28- 29, McKenzie et al disclose in figs. 9 and 12, a system for removing thrombus from blood vessels including: a catheter (110) has a lumen extending between the proximal and distal opening. The distal end of the catheter comprises a bent tip (fig. 9) with a rounded profile. The catheter is adapted to be advanced along the guidewire (100). Note that the distal opening of the catheter is dimensioned so that the vascular filter (10, at best seen in fig. 12) is capable of partially retracted in the lumen of the catheter.

Art Unit: 3731

Regarding claim 6, McKenzie et al disclose the catheter comprises a rapid exchange device (see col.4, lines 40-67, and col. 5, lines 1-30).

Response to Arguments

3. Applicant's arguments filed 5/13/2004 have been fully considered but they are not persuasive. Applicant is asked to please refer to the modified prior art rejection above where examiner addresses applicant's concerns regarding prior art rejection.
